MEMORANDUM FOR: Director of Training

SUBJECT : ELINT Course Enrollment

25X1  
25X1  
25X1  
1. The Registrar reports that as of 15 September 1959 seven persons have registered for the ELINT course beginning on 5 October. [ ] reports that two or three more may be forthcoming, and that at least two people wish to monitor the course. The last are in addition to [ ] who will monitor it in his capacity as Education Specialist.

2. [ ] has stated that it is his understanding that there should be at least 12 students registered in order for this course to be given. It is recommended that OTR proceed with this first running with the seven now registered plus any additional who may sign up by 1 October 1959. It seems to PPS to be essential that we get this initial presentation under our belts in order to check out our guest speakers, to make the necessary revisions and improvements in course content, training aids, etc.

[ ]  
Chief, Plans and Policy Staff

GAMBITS

8-14 September 1959

1. In my absence, the CI Faculty asserted a traditional claim to Room 118 and we lost it. [ ] has, however, given us the auditorium in [ ] or the 2 October [ ] briefing and introductory lecture and for the week of 12 - 16 October, the middle week of the course when the students return from [ ]. He promises to find a satisfactory room for the first three days of the third week when the students will be working field problems before their trip to Cape Canaveral.

3. PIC has asked to send two observers to the course, a request that I have accepted; TSS and OSI will probably want to send an observer each--they have not yet made formal application. The Office of Communications has said that it will take care of any reasonable number of observers provided they had properly cut orders authorizing them to receive rations and quarters in lieu of per diem. We shall undoubtedly get requests for other observers, who, I think, should not be reckoned among the bona fide students.

9. These last two weeks, [ ] and I are trying to nail down the details of each speech in a series of interviews, to bring out realistic schedules, and to settle administrative difficulties. Except for the interviews, the brunt of the work falls on [ ] I am on standby, on duty with the JOT Orientation course.

10. There are still an uncomfortable number of equations in which the value of "x" is not known. We are dependent on a faculty whose skills we cannot thoroughly test. I have made decisions whose wisdom cannot yet be proved or disproved.

NOTES:

A. [ ] has assigned us Rm. 153 for 19, 20, 21 October.

B. [ ] has assigned three of its members to the course. I am somewhat wary of this generous action of plucking feathers from its own breast to feather the enrollment.
